

HANDLING THE MANIFEST

ASYCUDAWorld used as a system to help streamline the delivery of goods in Curacao before during and after customs clearance.

SITUATION

Obtaining delivery of goods often requires complex logistical arrangements that importers make in order to have their goods removed from the customs control area within ports and airports. This process may require removal of one consignment in a staggered manner using several transportation units, which can cause challenges for both the terminal operator and customs to control yet facilitate the final delivery of goods.

SOLUTION

ASYCUDAWorld flexible technology allows traders to provide advance information about cargo delivery logistics. This tailored improvement also gives Customs Officers better means to perform the required controls and verification more efficiently and in a fully automated manner.

RESULT

Having goods removed and delivered from the port of entry may seem like a relatively simple and straightforward task but this involves many stakeholders and checks that can make it cumbersome for customs to determine whether all customs formalities have been satisfied. To address these challenges ASYCUDAWorld provides for:

- Better portal for submitting delivery requests prepared by the trader;
- Faster means to release and deliver goods after physical inspection is conducted;
- More efficient automated system cross-checks and verification when goods are exiting.

“The use of the flexible cargo manifest module avoids the complains that we get from the trader that the inspection of the declaration is taking too long. The clearance of goods is now faster. Wherever the customs officers are, they can use a tablet to get access to ASYCUDAWorld so they can do their work properly without using paper.”
